The **Viper Turbo-Air Li'L Bit II Commercial Grade Foam Generator** is ready to take on the toughest small cellular concrete jobsites.

It sets up in minutes and is completely self contained.

Simply attach your air compressor and insert the solution pickup hose into a pre-mixed container of liquid foam concentrate and water. **[or Auto-Inject]*

This system uses only compressed air. No electrical connection is needed.

Completely self contained, simple, effective, continuous, and variable, output **Viper Li'L Bit II™** Foam Generator. The regulated and metered “Balanced Air” system makes consistent high quality foam easy to do. All controls are factory calibrated; and, the **Viper™ Li'L Bit II™** comes with an owners manual complete with color photographs, mix design information, and a full one year limited warranty.

The **Viper Li'L Bit II™** is very cost effective. The **Viper™ Li'L Bit II™** matches foam production quality and output with small pressure tank or electric foam generators that cost hundreds more.

- NOTE: Don't Confuse the Viper Li'L Bit II with small agricultural foam-dribbling field markers. The Li'L Bit II is engineered and built as a commercial grade Cellular Concrete Foam Generator.
